TECHNOLOGY MADE SIMPLE

what is hosted IT?

Let's keep this really simple... The perception is complication and can it work for my business?

It's simple, a collection of computers, where everything is stored somewhere on the internet. These computers are in very secure buildings, called data centres.

Imagine having all your IT in a secure data centre, patrolled 24/7.

The data is securely backed up in a fire resistant building, then further backed up by another data centre.

With hosted you can access your desktop from any device at any time with nothing more than a basic internet connection.

Now you know what hosted really is, we can help you to use these services to increase your productivity.

the BIG idea

so what's the BIG idea?

Wouldn't it be great if all this was available to you and your key chosen business staff, 24/7, so you could be working even when you're not at work.

One of the benefits is that you could get those quotes out more efficiently to win more new business...

You could work from your office, but also at home, in a coffee shop or even in an airport lounge.

With hosted technology, you can. We keep your IT simple and secure.

offsite servers

work anywhere, anytime...

Offsite Servers provide a hosted desktop solution. This is a cloud based service that gives you a familiar desktop on any device.

Running any program on virtually any device. From standard software such as Microsoft Office 365, Sage, Quickbooks, or bespoke programs designed specifically for your business. We have not found an application we cannot install on a hosted server yet.

Working on hosted, you can sleep safely in the knowledge that all the programs that you use every day, as well as the files you value including your emails are here for you and securely backed up.

Imagine, opening Word on your phone, Powerpoint on your tablet, writing an email on your laptop and then sending it from your desktop, regardless of the device or manufacturer.

Your software is kept up-to-date automatically, so you are always using the latest versions.

OR HERE

OR EVEN HERE

offsite servers

everything is included...

So what does this mean?

Wouldn't the ideal scenario be that you could have a solution available to you, allowing you to work productively and efficiently on a day to day basis?

It would be beneficial to have a solution that includes everything you need so you can concentrate on your important daily tasks. Our hosted solution is just that.

Our hosted solution is an all inclusive solution with no hidden charges or extras:

- Hosted Desktop for all users
- Unlimited Hosted Support
- Firewall
- Security
- Antivirus
- Monitored Backups
- Disaster Recovery
- Application support
- Compliance

real savings...

Do you feel you are spending too much on your IT?

Our hosted solution can save you money on your annual IT spend. Fact.

There is no need for expensive capital outlay on hardware and infrastructure. Outsourcing your IT to a reputable provider like ourselves can be cheaper than you think.

We provide a solution that is tailor-made for every individual in the most cost effective way possible. Includes added benefits and our clients can see a considerable reduction in their IT spend.

If you currently employ IT staff within your business this can be a huge drain on time and money. Outsourcing your IT can cut costs of up-to 50%.

With our hosted solution our customers understand exactly what they are paying for each month and there are never any fluctuations in price. Customers can now track their IT spend and budget accordingly.

Hosted desktops can really help reduce your IT costs.

We would love to show you how much you could save.

offsite servers

damaged computer?

So your PC fails. Without warning, all of your data is gone.

Backups? Yes, that would have been a good idea but you just didn't get around to it.

The solution…A safe, secure and reliable alternative – a fully managed hosted desktop environment. This is what we can provide you with. It is our speciality.

It's difficult to retrieve data from a broken PC, but with everything stored online on your hosted server: your applications, documents, photos etc. are safe, just in-case something goes wrong.

What's more, you can access it from ANY device, even your friend's tablet if you need to. It's always wherever you are.

So don't worry about losing your data. With hosted, it's safe.

Welcome to the future!

offsite servers

the future is…

Offsite Servers have been working with businesses just like yours for years, supporting PCs and servers. We have seen what happens when it all goes wrong. It is our beleif that this is the best technology improvement to date, simplifying your IT.

The move? It's simple. We can move ALL your applications, data and user profiles to our servers.We don't even have to be there to do it (it's called remote working).

We also make sure all of your users are on the same application versions too, another headache you can forget about!

Reduce your IT costs, remove the risks of PC failure, whilst improving your users' mobility and efficiency. Drive those savings and efficiencies down to your bottom line, get in touch…
